ASK A CUSTOMER

“You quickly recover that investment in just a couple of months, not even a year, so it’s basically a no-brainer. On the cleaning side, our biggest operating expense with traditional surface cleaning is labor, which makes up more than half of the cost of operation. With this approach, you can reduce operating expenses by 40 percent or more. You can work faster and offer services at a lower price, making you more competitive with your clients.”
