

### **FORM RELEASE-TILT UP/ FORM IN PLACE**

Our equipment applies Release Agent and Curing Compounds with perfect precision every time for proper hydration.

### **WET CURING AND TEMPERATURE**

Our robots maintain perfect moisture conditions through exact water distribution and membrane application during the critical acceleration period.

### **CLEANING CHEMICAL RESIDUE**

The Sherpa Drone and Lavo Bot take over the cleaning of both vertical and horizontal surfaces, effectively and safely removing all contaminants.

## **Innovative Concrete Care Solutions for Modern Construction and Maintenance**

The Lavo Bot and Sherpa Drone represent the future of concrete care, offering automated solutions that enhance efficiency, safety, and quality in every phase of construction and maintenance. By embracing these technologies, you can take your projects to the next level, delivering exceptional results faster and more safely than ever before. Whether it's cleaning, curing, or form/tilt-up release, these advanced tools are designed to meet the needs of modern construction in the most effective way possible.

## Transform Your Concrete Business

### Release Agent and Curing Compound Application

**Better Quality:** Support proper hydration with even application

**Less Waste:** Use exactly what's needed, and the rest for your next job

**Safer Operations:** Avoid chemical exposure for your workers

### Smart Wet Curing

**Strength Development:** Increase concrete strength and durability with proper hydration

**Consistency:** Get consistent coverage with even application every time

**Reduced Labor:** Less need for constant monitoring with automated precision

### Surface Preparation and Cleaning

**Better Cement Hydration:** Achieve proper strength development with clean surfaces

**Reliable Prep:** Prevent future care with proper prep and even cleaning

**Reduced Labor:** Spend less time and money monitoring the process
